

Sustainable
Eco-Friendly
Waste-Reducing

Visit your local grocery stores and restaurants, and ask to throw your rotten foods or greasy bags in their composting bins. We take your unwanted food products and toss them in our composting piles in order to create fertile soil for our farmers and for you. Feel free to buy our fresh soil at your nearby home improvement stores and see the difference we can make by not only eating sustainably, but disposing sustainably.

De-Compost is a local food disposal service that caters to restaurants and grocery outlets. De-Compost takes care of the food and food product disposal. Whether it's rotten food or greasy bags, we will take it.
